Change of Septefx Wipes Configuration

Attn: Septefx Customers

Titan Worldwide Inc. is pleased to announce a product upgrade to the Septefx Dry Roll.

The rolls have been redesigned with a stronger material which also offers greater resistance to evaporation of product absorbed by the wipe. This provides for longer wipe life, potential for reduced product use, and the ability to clean more surface area before the individual wipe begins to break down.

The new wipes are the same dimensions as the previous ones, but now come in rolls of 50 as opposed to rolls of 100. Filling canisters in multiples of two will allow you to split one 500ML refill pouch for less product use on smaller surface areas, or add a whole pouch for added product absorption to cover larger areas with the same wipe. Fill as desired from 6L or larger size packages.

We have held the line on pricing; therefore, the 50 wipe rolls are exactly half the price of the previous 100 wipe rolls even though they are of superior quality. 100 wipe rolls will be provided in the short term until our inventory is depleted.

Titan Worldwide Inc. is dedicated to providing our customers the highest quality products on the market and will continue to keep you up-to-date on product development and improvements.

I would like to take this opportunity to thank you for your past support and look forward to working with you in the future. If you have any questions please do not hesitate to contact me.

Best Regards,

**Jay Currie
President – Titan Worldwide Inc.**
